

# DICENTIS Flight Case for 6 Multimedia Devices

www.boschsecurity.com

**BOSCH**  
Invented for life

- ▶ Proven construction
- ▶ Equipment shaped foam interior
- ▶ Easy to pack, unpack and transport equipment
- ▶ Roller wheels for convenient transportation
- ▶ Cushion grip handles; trigger release latches

The Flight Case is used for storing and transporting DICENTIS equipment. It has compartments for 6 multimedia devices, 6 high-directive microphones, 6 microphones with short or long stem, and a compartment for cables.

The flight case is manufactured from proven material to ensure for adequate protection of your DICENTIS equipment during transportation and storage. The handles and latches are recessed and protected. The shaped foam interior ensures for smooth and fast packing and unpacking of equipment. The flight case has a retractable handle and wheels for convenient ground transportation and to prevent unnecessary lifting.
